

Procedure for preparing **accelerated** Dentin Graft (Partial Demineralized Dentin Graft)

STEP 1

DENTIN Cleanser
(RED Cap)

STEP 2

EDTA
(BLUE Cap)

STEP 3

PBS Wash
(GREEN Cap)

Liquid

Procedure

Cover graft for 5 minutes with solution and dehydrate with a sterile gauze

Cover graft for 2 minutes with solution and dehydrate with a sterile gauze

Cover graft with solution, mix with a sterile spatula or swirl and dehydrate with a sterile gauze. Repeat TWICE.

Duration

5 minutes

2 minutes

Should take ~1 minutes

Notes: The above procedure will result in 20um of demineralized dentin surface exposure to induce osteogenic activity of dentin.
